

Axolotl GRAFT™

Products & Benefits

Axolotl Graft™ is a dehydrated human amnion membrane allograft (dhAM) derived from the amniotic lining of the placenta. **Axolotl Graft™** is indicated as a wound covering and structural barrier. **Axolotl Graft™** is marketed under Section 361 of the PHS act and regulated under 21 CFR Part 1271.

Axolotl Graft™ is processed through minimally manipulated techniques, retaining the native qualities of the amniotic membrane to function as a wound covering and as a structural barrier.

Proteins found in **Axolotl Graft™** include:

Quality Assurance

- Collagen I, III, IV, V and VII
 - Fibronectin
 - Laminin
- The donor tissue is recovered and processed under sterile conditions, in accordance with all FDA guidelines and quality assurance standards in a controlled environment. **Axolotl Graft™** allograft tissue products are terminally irradiated in the final package. **Axolotl Graft™** is only intended for use in the domestic United States.
